Additional: Team Leadership, Mentoring, Figma to Code, Pixel-Perfect Design, Mobile-First Design, Jira, Trello, Notion, Agile, Scrum, Kanban, Sprint Planning, Backlog Management, Cross-functional Collaboration, Technical Decision Making, Code Review, Technical Writing, Product and Module Ownership, Autonomy, Remote Work, Distributed Teams, Adaptability, Continuous Learning, Knowledge Sharing, Slack, Microsoft Teams, Pair Programming, Technical Interviewing, Stakeholder Communication

Languages: English (C1 - Advanced), Spanish (Native)

EDUCATION

University of Informatics Sciences — Havana, Cuba
Computer Sciences Engineer - Bachelor's degree — Sep 2013 - Jul 2018

freeCodeCamp — Online
Responsive Web Design Certificate — 2021

SELECTED EXPERIENCE

El Asadito SRL — Remote, Havana, Cuba
Software Engineer — Jun 2026 – Present

- Designing and building, as sole engineer, a company-wide ERP (Nuxt + Supabase) for a wholesale beverage distributor operating across three provinces; inventory, sales/distribution, logistics, commercial, invoicing, supplier reconciliation and finance modules are live for 6–20 daily users.
- Replaced manual processes across departments, saving an estimated 30+ hours of work per week.
- Reduced stock discrepancies by ~70% and brought cash discrepancies close to zero through consignment-based supplier reconciliation and inventory controls.
- Built delivery and client-visit route planning for the company fleet on the openrouteservice (HeiGIT) routing API, and integrated supplier APIs for client and business data.
- Delivered the full stack alone using agent coding workflows, with Supabase Auth and business logic in Postgres RPCs and Vercel Edge Functions.

Delfín Motor Labs SL Remote, Madrid, Spain

Senior Front End Developer Jan 2026 – Apr 2026

- Built frontend for custom CMS (Nuxt + Vuetify) and consumer storefront (Nuxt + Tailwind Plus) consuming Laravel APIs; implemented authentication via login form and SSO (Google) using Laravel Sanctum.
- Implemented comprehensive SEO strategy including meta tags, dynamic sitemap generation at build time, Schema markup, and canonical URLs; improved Core Web Vitals (LCP: 3.2s → 1.4s, CLS: 0.15 → 0.08) and increased organic traffic by 38%.
- Leveraged Nuxt rendering strategies (SSR, SSG, SWR, ISR) with Cloudflare Page Rules, CDN, and caching; reduced TTFB by 52% (450ms → 220ms) and overall response times by 48%.
- Implemented Stripe payment integration for end-user product purchases within the store.
- Set up GitHub Actions CI/CD workflows for staging and production with ESLint and auto-format checks; caught 28+ code quality issues before deployment, cut code review time by 35% and prevented 62% of deployment failures.

Blue Creator Agency | Kimia Group Remote, Madrid, Spain

Senior Front End Developer Jan 2025 – Nov 2025

- Developed monetization/gamification consumer app with missions system (install apps, play games), points rewards, referral program with codes, daily missions, and redemption for 20+ gift card providers.
- Delivered 120+ Jira tasks for internal CMS and consumer monetization app; ownership of product and tasks, delivery of critical features to production.
- Implemented responsive pixel-perfect UIs from Figma mockups for high-quality user interfaces.
- Led gradual migration of 40+ Vue components from Vuetify to Tailwind; pushed when ~70% migrated, reducing bundle size by 19% and improving LCP from 9.1s to 6.6s, contributing to a 15% conversion lift.
- Implemented mechanism to track conversions and revenue per user via Google Analytics.

BSE America Remote, Panama

Lead Developer Jan 2024 – Nov 2024

- Architected and developed end-to-end CRM with RESTful APIs in Laravel for WooCommerce integration (products, customers, orders sync) and Panama's electronic billing system (YAML format, tax compliance), achieving near 100% delivery success rate.
- Implemented CI/CD pipelines with automated code quality checks (PSR-12, PHPStan, PHPUnit), deployed backend to VPS and frontend to Vercel; reduced deployment time from ~20min to ~4min.
- Integrated AWS S3 for secure file storage, Redis for caching, and Swagger for API documentation.
- Mentored 3 junior developers, improving code review approval rate from 40% to 85% through code standards.

EncodeBiz Remote, Madrid, Spain

Front End Developer Nov 2023 – Jan 2024

- Spearheaded frontend for padel tournament system with scheduling, results, player registration & tracking, scoreboards, and tournament management.
- Translated Figma into pixel-perfect React UI and increased admin flow completion by ~20%.
- Integrated React UI with Node.js/Express API; optimized data flow and API calls, cutting integration issues by ~30%, and optimized local workflows with ngrok, shrinking backend feedback cycles from hours to minutes.
- Wrote unit tests with React Testing Library for critical components and flows; improved code reliability and reduced support tickets.

First Due (Inc 5000 company since 2022) Remote, New York, US

Full Stack Developer Mar 2021 – Nov 2023

- Led migration of Yii PHP templates to Vue Router with per-module SPAs; reduced load time by 45%.
- Built statistics module from scratch with reports; Fire Prevention stats sub-module, then other devs replicated for their modules.
- Developed multi-tenant SaaS features for Fire Prevention, EMS, and Assets modules serving 40+ fire departments.
- Implemented barcode/QR scanner component for asset tracking processing 5,000+ daily scans with 99%+ accuracy.
- Integrated medical compliance (NEMSIS standard) for EMS module; handled medications and connected cardio readers apparatuses.
- Worked on incident module with Google Maps and ArcGIS for incident tracking.

Tecnomática On-site, Havana, Cuba

Front End Developer Dec 2020 – Mar 2021

- Built Angular modules for fuel logistics system (distribution, stations management, storage, cisterns).
- Mentored junior developer (recent graduate, no framework experience) via pair programming and study roadmap, shipping production features within a few weeks.
- Improved critical logistics queries by ~25-30% via database optimizations (indexes, normalization/denormalization) and migrations from MySQL to PostgreSQL.

Grupo de Electrónica para el Turismo (GET) On-site, Havana, Cuba

Full Stack Developer (Junior) Mar 2019 – Nov 2020

- Led development of multi-tenant Laravel/Vue document management system with RBAC (full CRUD over roles, based on permissions), document scanning & attachments, separate database per client.
- Implemented Elasticsearch integration reducing search times to under 1 second.
- Deployed on-premise version at Ministry (no internet, subnet only); manual deployment, stakeholder communication, infrastructure team coordination.
- Implemented authentication via email + password + client selector.
- Designed and implemented RESTful APIs for hotel restaurant reservation system (Express.js/Sequelize/PostgreSQL) with booking, availability, menus for restaurants within hotels, dynamic pricing and automated notifications; improved booking completion by ~15%.

Banco Central de Cuba (BCC) On-site, Havana, Cuba

Full Stack Developer (Junior) Sep 2018 – Feb 2019

- Implemented asset tracking, inventory updates, and compliance reporting in .NET/C#/SQL Server for physical assets.
- Built forms and reports for internal audits and asset numbers for locals.
- Implemented automated report generation and audit trail logging, reducing manual reporting effort by ~20-30%.
- Collaborated with cross-departmental stakeholders to align the system with regulations, smoothing audits and reducing rework.
